YOUR VISUALIZATION  
SOFTWARE SUITE

# FAST, EFFICIENT, COLLABORATIVE AND LIMITLESS ...

DeltaCAD, a company specialized in optimization and preparation of 3D models, adds 4Dmu to its products line, a new visualization software suite.

## MAIN ASSET

Collaborative project review capabilities.

These functions allow sharing in real time, 3D views and engineering information between each project review participants, using heterogeneous visualization hardware and immersive environment.

## MAJOR FEATURES

- 4Dmu suite is optimized to visualize very large industrial digital mockup.
- Compare, find, annotate, measure, select, hide, display, export by acting on the 3D model and product tree are the most important tools to review your design projects and to take quickly the right decisions.

## BONUS INFO!

3D model optimization provided by GPure adds another big factor of performance to 4Dmu capabilities

## WHAT IS 4DMU SUITE ?

Dedicated to engineering, 4Dmu opens in a few seconds almost all types of 3D natives CAD files. 4Dmu answers all visualization needs and runs on tablets, office computers, workstations, immersive environments, multichannel and tracking, headsets and Web environment.

## CLIENT BENEFITS

- Improved collaborative work between all company services by sharing digital mockup.
- Money Saving: Avoiding CAD software installation on each computer used only to visualize the digital mockup.

## DeltaCAD TEAM

The DeltaCAD technical team can analyze and answer your particular needs for your business by adapting and developing dedicated 4Dmu capabilities.
